call 541-964-5031 for more info.

Mapleton School District June 2014 Calendar of Events

- Last Day for Seniors: 6/4
Free Sports Physicals: 6/4
Graduation: 6/7 at 2:00 PM
Elementary Awards Assembly: 2:00 PM
Last Day for Kindergarten Students: 6/10
Last Day of School: 6/11, dismissal at 12:00 PM
June District School Board Meetings: 6/11 at 6:00 PM

Deadwood Country Market

Open Hours: Tuesday thru Saturday 8:00am - 7:00pm
Sunday & Monday 8:00am - 6:00pm

Let me know what you think!

About the possible spraying herbicides toxic to us and animals on and near the two recent logging sites on the east side of lower Deadwood Creek Road. Anyone/everyone call and connect with at least three consecutive neighbors notifying them to get in and stay indoors and to call three consecutive neighbors whenever a helicopter is heard. Each time such an alert is made let me know and I will be put a note in the following Ditto and perhaps other publications.

Keith, -3502

Saturday, May 3, on West Fork Rd., three incidents of theft (firewood, freezer meats, and cash) and one incident of break-in and trashing of a rental were reported.

Also Saturday, May 3, at night, in the middle Deadwood Creek Rd. area, one incident of drive-by shooting was reported. A neighbor found twenty gauge casings the next morning.

To report incidents call, Jesse @ 964-3049, or Maryanne @ 964-3099.

DNW resumes monthly, second Thursday, member meetings at the Community Center at 6:30 p.m. June 12 is our next meeting.

No Cost Ways to Help Siuslaw Watershed Council

If you have a Fred Meyer card, go to www.fredmeyer.com/communityrewards and follow the directions to direct donations to SWC. The Fred Meyer non-profit number for SWC is 81032.

If you shop at PC Market in Eugene or eat in restaurants there, check out www.escrip where participating merchants make donations up to 5% of your purchase to your designated non-profit or school.

By Nancy Nichols, Deadwood Representative to Siuslaw Watershed Council

What is WEATHER? Weather is the air temperature, cloud cover, precipitation, and wind at any particular time in any particular place. Weather reflects the prevailing conditions of the air masses overlying the land and seas over the entire globe. Weather patterns over a period of time present a picture of climate.

What causes changes in the weather? The entire atmosphere surrounding Earth is in constant motion caused by the uneven heating effect of the sun due to the spin of the Earth on its axis as it orbits the Sun. This causes the atmosphere to be composed of distinct air masses that have different temperatures, different amounts of moisture, different atmospheric pressures. To add to the complexity, the air masses are moving at different speeds at different levels above Earth's surface. Each air mass brings

What about weather forecasting? At one time weather forecasting was simply a matter of experience gained from careful observations of weather patterns. Such experience was passed on through such proverbs as Birds flying low Expect rain and a blow. This observation has a scientific basis because birds adjust their flight to the optimum density. When the air pressure is low, the optimum density for bird flight is also low. And, when air pressure is low, rain and wind can be expected.

How accurate are weather proverbs? Today we have generally replaced weather story-telling, cautionary tales, and proverbs with easily retrievable, digitally recorded data. However, for many of us the appeal of a story or a proverb is compelling and more likely to be remembered. Take for example the proverb Flowers smell best just before a rain. This has a scientific basis because scents are more easily detected in moist air, and moist air very often foretells rain.

Why is the study of weather called meteorology? The answer to this question refers back to ancient Greece where a meteor was any atmospheric phenomenon that might appear in the sky. This of course included clouds, rain, rainbows etc. Aristotle, the ancient Greek philosopher-scientist, wrote a book called Meteorologica which explained all that was then purported to be known about the sky. In this early textbook of atmospheric science Aristotle described hurricanes as being caused by evil winds falling upon good winds with a resulting moral conflict. Modern explanations are quite different.

TUNNELVISIONS

(by: JUST MARK)

I recently conducted a seminar on how folks in this river valley could help fight industrial pollution in small third world countries when the subject of how the Great Lakes helped change the world came up.

Sometime in the latter 1800's, the world's largest deposits of iron ore were discovered in northeast Minnesota. The science of coking had by then been perfected and iron gave way to become steel. Shipping of the ore through the Great Lakes built large cities: Duluth, Green Bay, Chicago, Detroit, Cleveland, Buffalo.

Then, locks were built around Niagra Falls and, through the Saint Lawrence Seaway, and into the Atlantic, the oreboats went to serve the world. The cities built many steel mills and hundreds of thousands of jobs were created. Finished steel could now be sent to all regions of the U.S. All parts of America grew and prospered. World Wars, the automotive industry, the list goes on forever of what those oreboats did to shape this country and the world. Gives one pause for thought!

Well, our first seminar didn't go too well but our next one came up with a great idea to keep the polar icecaps from melting.

First of all, we round up all icebergs in the regions. We tow them back to poles and re-attach them with liquid nitrogen. Then, periodically, we spray all coast lines of both poles with the liquid nitrogen and they won't melt anymore. Brilliance in simplicity!

FACTOIDS PRESENTED IN MAY EDITION OF DITTOOooooops

1. "GENTLEMEN ONLY LADIES FORBIDDEN" FOR ACRONYM "GOLF"
THIS FACTOID IS UNTRUE :There is no acronym. The word derives from medieval Dutch and old Scots. The medieval Dutch word "kolf" or "kolve" meant "club." It is believed that word passed to the Scots, whose dialect transformed the word into "golve," "gowl" or "gouf." The word "golf" had emerged by 16th cent.

http://golf.about.com/cs/historyofgolf/a/hist_golfword.htm

2. FACTOID UNTRUE: "MONOPOLY" PRINTS MORE MONEY THAN THE US MINT. A few years of US currency printing exceeds all 76 years of Parker Brothers printing monopoly notes.

Hasbro.com (faq, corporate info), US Bureau of Engraving and Printing, US Mint, CNBC.

3. "RULE OF THUMB" FACTOID IS NOT RELATED TO BEATING WOMEN/ IT'S A MYTH :The 'rule of thumb' says that English law allowed a man to beat his wife with a stick so long as it is was no thicker than his thumb. This has never been the law in England. There are no printed records that associate it with domestic violence .

<http://www.phrases.org.uk/meanings/rule-ofthumb.html>

4. FACTOID "Coca-Cola was originally green". FALSE The Coca Cola company itself says it is not true. Coca-Coal was at one time in green bottles. The drink itself was always brown.

<http://www.snopes.com/cokelore/green.asp>

5. FACTOID: Position of horses hooves/legs tells a story about battle in statuary. NOT TRUE: There is a list of statues with generals and others mounted on horseback on the website below, proving that the statues do not conform to the so-called code regarding their horses' leg position(which ostensibly describes whether the person was wounded or died in battle).

<http://www.snopes.com/military/statue.asp>

I researched all of the factoids submitted in May. All of them were either untrue or not substantiated. There was no room in Ditto for more corrections] submitted by Yvonne de Miranda

"It is the first responsibility of every citizen to question authority."
Benjamin Franklin, quoted in the Montreal Gazette

"It has been our fate as a nation not to have ideologies, but to be one."
Historian Richard Hofstadter, quoted in The Washington Post

Factoid

From Wikipedia, the free encyclopedia

A **factoid** is a questionable or spurious (unverified, false, or fabricated) statement presented as a fact, but without supporting evidence. The word can also be used to describe a particularly insignificant or novel fact, in the absence of much relevant context. The word is defined by the *Compact Oxford English Dictionary* as "an item of unreliable information that is repeated so often that it becomes accepted as fact".

Factoid was coined by Norman Mailer in his 1973 biography of Marilyn Monroe. Mailer described a factoid as "facts which have no existence before appearing in a magazine or newspaper", and created the word by combining the word *fact* and the ending *-oid* to mean "similar but not the same". The *Washington Times* described Mailer's new word as referring to "something that looks like a fact, could be a fact, but in fact is not a fact".

Factoids may give rise to, or arise from, common misconceptions and urban legends.

Factoid - Wikipedia, Other meanings

The word *factoid* is now sometimes also used to mean a small piece of true but valueless or insignificant information, in contrast to the original definition. This has been popularized by the CNN Headline News TV channel, which, during the 1980s and 1990s, used to frequently include such a fact under the heading "factoid" during newscasts. BBC Radio 2 presenter Steve Wright uses factoids extensively on his show. Occasionally these can be incorrect, such as in September 2012 defining a Googol as the number 1 followed by one million zeroes, when the correct definition is the number 1 followed by one hundred zeroes.

As a result of confusion over the meaning of factoid, some English-language style and usage guides recommend against its use.^[a] Language expert William Safire in his *Oxford Usage Column* also says that the word factoid is "not to be used".
