DEADWOOD NEIGHBORHOOD WATCH

No incidences were reported in April 2014.

DNW Member's Meeting will **not** be held in the month of May.

To report incidences, call Maryanne @ 964-3099 or Jesse @ 964-3049

Tunnelvisions

By Mark XPG

The other night I was hanging out with some friends playing some riveting games of Rockin' Robots when the subject of cheese came up. I had no choice but to digress.

South of Spokane in Pullman lies the University of Washington. A unique campus because it has a creamery. All grad students are required to take a semester making cheese. Cougar Gold is an aged sharp white cheddar that has become synonymous with the creamery. Move over Tillamook, this stuff blows it away. It rivals any cheddar in North America. Albeit expensive, if you are a cheese lover, you have to got to try this stuff. You can get it online at 800-457-5442. If you don't like it, I'll buy it from you. Because of temperature concerns, they will not ship in the summer so this is a good time to get some. Makes a great Christmas present. End of digression.

My friend and I have become so fond of Rockin' Robots, I bought a signature edition made of fine teak and mahogany. We've decided to expand our gaming horizons so next month I'll be hosting a Chutes and Ladders tournament. After that, we'll be testing our surgical prowess with some rousing games of Operation. And you kids thought we were just a bunch of old Fuddy Duddys.

Sunday & Monday 8:00am - 6:00pm

What?

Many years ago in Scotland, a new game was invented. It was ruled "Gentlemen Only...Ladies Forbidden"... and thus the word GOLF entered into the English language.

Every day more money is printed for Monopoly than the US Treasury.

Men can read smaller print than women can; women can hear better.

Coca-Cola was originally green.

In the 1400s, a law was set forth that a man was not allowed to beat his wife with a stick thicker than his thumb. Hence we have "the rule of thumb".

The cost of raising a medium-size dog to the age of eleven: \$6,400

The first novel ever written on a typewriter: *Tom Sawyer*.

Each king in a deck of playing cards represents a great king from history:

- Spades - King David
- Hearts - Charlemagne
- Clubs - Alexander, the Great
- Diamonds - Julius Caesar

If a statue in the park of a person on a horse has both front legs in the air, the person died in battle. If the horse has one front leg in the air, the person died as a result of wounds received in battle. If the horse has all four legs on the ground, the person died of natural causes.

What do bulletproof vests, fire capes, windshield wipers, and laser printers all have in common? All were invented by women.

In Shakespeare's time, mattresses were secured on bed frames by ropes. When you pulled on the ropes the mattress tightened, making the bed firmer to sleep on. Hence the phrase... "good night, sleep tight."

In English pubs, ale is ordered by pints and quarts... So, in old England, when customers got unruly, the bartender would yell at them, "Mind your pints and quarts, and settle down." That's where we get the phrase, "mind your Ps and Qs".

■ **What is wind?** Wind is air that is moving across the surface of Earth. It is caused by the movement of the air masses in the lower levels of the atmosphere. Many winds are seasonal and have names: the sirocco is a hot, dry wind that blows from the south or southeast out of the deserts of North Africa or Saudi Arabia; in coastal southern California, Santa Ana winds are hot, dry, late summer, north or northeast winds that blow from the inland high deserts and through the mountain passes across the California coastal plain.

■ **What is a "Trade Wind?"** Trade winds are strong, steady winds named because, through the ages, they have helped merchant ships move across the oceans. These winds blow from east to west and push on the waters of the oceans as they blow across their surface. The friction of the moving air across the water sets ocean currents in motion and keeps them moving in the direction of the wind. There are two other belts of steady winds; one blows from west to east in the mid latitudes, the other blows from east to west near the poles.

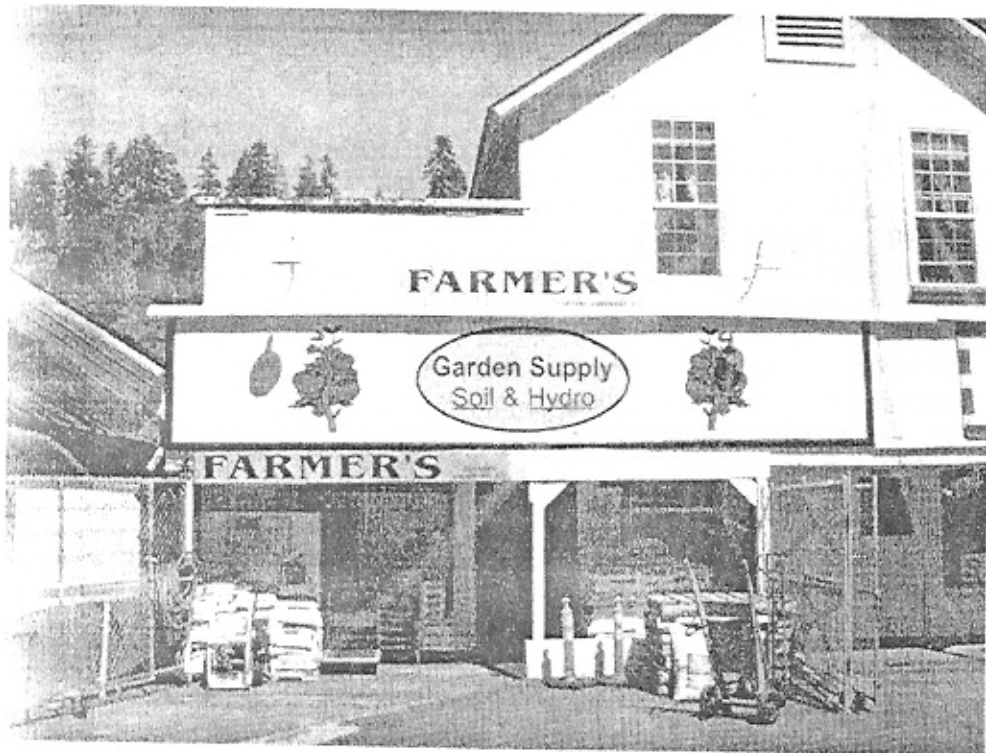

■ **What happens when trade winds do not blow?** Most years trade winds blow steadily from South America and west across the Pacific pushing surface coastal waters westward. This creates an upswelling of cool water. When the trade winds do not blow, the waters warm up. This warm water gradually spreads partway across the Pacific and as far north as California and Washington. Vast changes in the global circulation of air masses result and strange weather is experienced around the world. This phenomenon is called **El Nino** and it happens irregularly sometimes two or as many as ten years apart.)

■ **What are the names of some local winds around the world?** Trade winds and the Santa Ana have already been mentioned but there are many more including: the sirocco of Africa; the bolon, nirta or tamboen of Sumatra; the Tehuantepecer of Mexico; the puelche which blows across the Andes mountain ranges of South America; the knik of Alaska; the kona and the mauka of Hawaii; and the mistral the dry, cold northerly wind that blows down the Rhone valley in France.

"SOIL & HYDRO" SUPPLIES, TIME TO GROW TO FARMER'S!

No Bake Peanut Butter Bars

Ingredients

1 cup butter (melted)
2 cups graham cracker crumbs
1/4 cup brown sugar
1 1/4 cup powdered sugar
1 cup peanut butter
1/2 tsp. vanilla
1 (11 oz.) bag milk chocolate chips

Directions

Combine all ingredients, except chocolate chips in a medium sized bowl. Stir until the mixture is smooth and creamy.

Pour peanut butter mixture into a 9x13 pan.

Melt chocolate chips in the microwave (at 50% power) for 1-2 minutes. Stir chocolate and pour over the peanut butter mixture. Spread chocolate with a spatula. To even out chocolate, tap pan on the counter.

Refrigerate bars for one hour. Cut before completely cooled.

These taste much like Reese's Peanut Butter Cups. Enjoy!

Refined Sugar is the only food known that provides calories but no nutrition. About 100 pounds of Sugar are eaten per person each year in America, and only 36 percent of it is taken directly. The rest is "hidden" in commercially sweetened and prepared foods like ketchup, baby food, canned fruits, and cereals. Children, it is estimated, consume 3 to 4 pounds of refined Sugar a week.

Adventures of Me and My Shadow

By Linda, the Paper Lady

One morning in March, on my way home from my route, just before entering Mapleton, I had a National Geographic "Kodak Moment" when a cougar came running from the river side, jumped to the middle of the road, then went airborne up the embankment to the railroad tracks. My first cougar sighting ever and what a beautiful sight it was, a moment I will never forget. That day I called Don Beck to warn him, as it was on the edge of his property. I haven't seen it yet, but have been told that they caught it on video on their property a night or two later.

A couple of weeks later, after crossing a bridge, I went around the corner on West Fork and another cougar jumped onto the road in front of me, ran about thirty feet up the road, then disappeared into the bushes on the other side. Wow! I thought what are the chances? It was another "Kodak Moment". No cougar sightings in the nine months of deliveries and then there are two within two weeks.

Well, on April 18th, I had my relief driver with me to refresh his mind, as I was going on vacation for a week. Up past Deadwood, on Highway 36, we both saw something run across the road at the same time. He said he couldn't tell what it was. I knew. It was another cougar. He was farther away, but after seeing the other two, I had no doubt I had seen three cougars in a month.

I have lived and hunted in Oregon all of my life, but had never seen a cougar in the wild. Shadow didn't seem to notice, but I was in complete awe.

** I went on vacation for a week and now apologize to my customers for any inconvenience during that week.

BINGO ~ \$15.00 FOR Packet

Where ~ Triangle Grange

When ~ May 10th & 24th

Saturday, May 17, 2014 "Third Saturday"

Live Music, Dinner, Dance

welcomes back

The Michael Anderson Trio

The Deadwood Creek Community Center welcomes back famed area musician Michael Anderson on Saturday, May 17, for the "Third Saturday" monthly live music, dinner, and dance. The Michael Anderson Trio features Stan Becraft on drums, Gene Douma on bass and vocals, and Michael Anderson on guitar and vocals. Michael has traveled internationally backing artists as well as playing styles of music from Country to Rock to Jazz, Folk, and Rhythm and Blues. He's worked in video and radio production and as a session musician on numerous albums by local artists. His experience shows with soulful singing and jazz-influenced guitar riffs. Michael's association with Gene Douma, bass and vocalist goes back a long way, to the '80's. Gene's has worked locally with many bands over the years, including Coupe DeVille. He has a very unique, supportive style of playing that makes the group seem larger than it is, and is always right on the spot with lead vocals and harmonies. Stan Becraft on drums is a Eugene fixture for many years who's worked with Mr. Wizard, Bill Monti, and L.A. Wrecking Crew drummer Hal Blaine. He brings a great time and playful inventiveness to the trio. The trio plays everything from Frank Sinatra to Classic Rock, with great musicianship, harmony, and humor. Their versatile music will fill the Deadwood Creek Community Center with plenty of rhythm for the listeners and the dancers.

Come join this family friendly event in our beautiful country springtime setting with a delicious dinner, non alcoholic beverages and desserts for sale starting at 6:30, available throughout the evening as long as it lasts. The dance floor will open up for the start of the music at 8pm. The Center is located 4.3 miles up Deadwood Creek Rd. off HWY 36. A sliding scale donation is appreciated at the door for the band. Call 541-964-5031 for more info.
